**PARENT SUING PORTLAND, OREGON PUBLIC SCHOOL SYSTEM IN DISTRICT COURT
CITING BREACH OF 14TH AMENDMENT RIGHT TO CHOICE BY INSTALLING WI FI
WITHIN PUBLIC SCHOOL BUILDINGS**

Portland, OR – June 19, 2011 – A parent of a child in a Portland Public School is suing PPS, for installing a wi fi infrastructure throughout the school system. Citing breach of 14th Amendment **right to choice**, the plaintiff in the case has serious, legally and scientifically established concerns about the safety of wi fi technology and its potential biological effects on children. These concerns have been made more urgent by the recent (June 2011) **World Health Organization classification of radio frequency radiation as a 2B “possible” carcinogen.**

The plaintiff contends that PPS policy of using wi fi in their schools impinges on his rights and fundamental liberties under the Fourteenth Amendment to the care and control of his child's health and continued well being. The plaintiff will seek an injunction to stop the use of wi fi immediately until the case is resolved by the courts.

The Portland School Board would not consider the many scientific studies that have been made available to them and would not speak to Mr. Morrison despite numerous attempts by him to discuss the matter.

PPS inserted a Wi Fi infrastructure without compliance of HHS (Health & Human Services) institutional requirements for “subjecting children to an agent whose effect on whole body health” is at **best, “a possible carcinogen--.”** (W.H.O.). It is known that children's developing bodies are much more sensitive to radio frequency radiation than adults and should be more cautiously considered when being exposed to environmental toxins of any kind. There is concern within the international scientific community that full body exposure to RF from Wi Fi technology, for 7-8 hrs each day may not be safe. Cancer, sterilization, DNA damage, and leakage of the blood brain barrier are but a few concerns

An employee within the I.T. Department of PPS said the “safety of wi fi and RF radiation was not a consideration” and that the school board relied entirely on information supplied by the manufacturer, Cisco Systems. None of the information supplied by Cisco Systems makes the claim that wi fi is safe.

Using children as guinea pigs, by exposing them to wi fi radiation in schools, is a violation of national and international law as information is being gathered on the effects of wi fi by the National Toxicology Institute without the informed consent of the individuals involved.

PPS use of wi fi is also a breach of the **Americans With Disabilities Act** which requires a safe environment for people with disabilities. In peer reviewed studies, Magda Havas, PhD (www.magdahavas.com), has shown that **wireless technology affects blood sugar and medical implants** which makes a wi fi environment even more precarious for children with diabetes, implants, and certain other health related conditions that are affected by exposure to radio frequency radiation from wi fi emissions.

- **Testifying on behalf of Mr. Morrison, and his daughter, will be 4 expert witnesses from 3 different countries: Dr. David Carpenter, Director, Institute For Health and the Environment University @ Albany, N.Y. (a presenter to President Obama’ s cancer panel); Barrie Trower; retired Head of Microwave Research for British Military Intelligence, Curtis Bennett, Infrared Imaging Expert, Thermografix Corporation, B.C. and Lloyd Morgan; Senior Research Fellow, Environmental Health Trust. INTERNATIONAL RESPONSE TO PAST AND EMERGING SCIENCE:

In Sept. 2007 Germany advised avoiding wi fi “wherever possible.” In April 2009, in response to “urgent” outcries from scientists and the public, the European Parliament’s Committee on the Environment, Public Health and Food Safety voted overwhelmingly to recommend that precautions be taken to protect human health with regard to “wireless technologies, such as mobile phones, Wi-Fi/Wi-Max, Bluetooth, DECT portable phones and cell towers.” Since then several European countries have taken action. The teachers union in Great Britain said “wi fi should be banned from all schools.” Recently Switzerland, home of the World Health Organization, announced it will be removing wi fi from all of its schools. France has removed wi fi from the Sorbonne, the National Library and some of its schools as well. Ireland refused wi fi in its schools. In Nov. 2010, the govt. of Israel recommended adopting the “precautionary principle” by reducing exposure in its schools. Currently, one Canadian school will be removing wi fi after several students developed acute debilitating physical symptoms

GOVERNMENTS AND ORGANIZATIONS THAT BAN OR WARN AGAINST WIRELESS TECHNOLOGY

1993: Environmental Protection Agency (EPA): The FCC’s exposure standards are “seriously flawed.”

Official comments to the FCC on guidelines for evaluation of electromagnetic effects of radio frequency radiation, FCC Docket ET 93-62, November 9, 1993.

1993: Food and Drug Administration (FDA): “FCC rules do not address the issue of long-term, chronic exposure to RF fields.” Comments of the FDA to the FCC, November 10, 1993.

1993: National Institute for Occupational Safety and Health (NIOSH): The FCC’s standard is inadequate because it “is based on only one dominant mechanism—adverse health effects caused by body heating.”
Comments of NIOSH to the FCC, January 11, 1994.

1994: Amateur Radio Relay League Bio-Effects Committee: “The FCC’s standard does not protect against non-thermal effects.” Comments of the ARRL Bio-Effects Committee to the FCC, January 7, 1994.
